OBJECTIVE Cybersecurity student with hands-on experience in offensive security, malware analysis, and secure network design. Highly motivated individuals with a proven track record in CTFs and hackathons, committed to continuous learning and staying updated in the cybersecurity domain.

EDUCATION **Saipal Academy, Dhumbaharai, Kathmandu**
Cambridge A-levels, 2020-2022

Softwarica College of IT and E-Commerce, Kathmandu, Bagmati
BSc (Hons) Ethical Hacking and Cybersecurity
Year III Running | Expected Graduation: 2025

EXPERIENCE

IT Auditor

May 2026 – Present

Himalayan Integrated Cloud Technologies

- Conducting ISO 27001 Annex A compliance audits for SEBON-licensed brokerage firms, assessing all 93 controls against implemented policies, vendor agreements, and IT infrastructure evidence.
- Reviewing internal information security policies, vendor contracts, and technical documentation to evaluate control maturity and identify compliance gaps.
- Drafting formal audit observations, gap analyses, and missing policy documents aligned with NEPSE-approved compliance formats.
- Mapping vendor SLA and third-party evidence to relevant ISO 27001 controls and coordinating with client stakeholders to validate audit findings.
- Producing consolidated audit reports and compliance checklists for client submission and internal review.

Penetration Tester

June 2025 – Present

Himalayan Integrated Cloud Technologies

- Conducting Vulnerability Assessment and Penetration Testing (VAPT) on web applications, network infrastructure, firewalls, antivirus systems, and databases.
- Identifying security vulnerabilities and providing remediation recommendations.
- Assisting in security audits and risk assessment processes.
- Preparing detailed technical reports for clients and internal teams.

PROJECTS

- **Command and Control:** Developed a lightweight C2 framework to simulate remote command execution.
- **Cryptography-based E-Voting System:** Implemented public-key cryptography and digital certificate validation for secure voting.
- **Intrusion Detection System:** Built a Python-based IDS using signature-based and anomaly detection techniques.
- **Web Enumeration Tool:** Developed a tool to scan and enumerate vulnerabilities on web servers.
- **Networking Architecture:** Designed a three-tier secure network model with firewall rules and subnet isolation.

TECHNICAL SKILLS

- Networking (CCNA 1 & 2)
- Python, Bash Scripting
- Reverse Engineering & Cryptography
- Linux Environments & Docker

ACHIEVEMENTS

- Winner – Softwarica CTF Competition 2024
- 2nd Runner-Up – Softwarica Hackfest 2025
- 1st Runner-Up – OWASP Nepal Cybersecurity Challenge 2025
- Top 10 – IEEE LogPoint CTF TU 2025
- 1st Runner-Up – HackAstra CTF at Herald College 2026

COMMUNITY ENGAGEMENT

- **TechX Softwarica 2024:** Wazuh SIEM and Evilginx phishing demonstration.
- **TechX Softwarica 2025:** C2 (Command and Control) and real time CTF platform demonstration
